Objective

Seeking a challenging opportunity in a growth-focused and collaborative environment where I can effectively apply my skills and knowledge to contribute to the success of the organization while building a rewarding career.

Experience

Own Paramedical Institution (OCT 2023 - APR 2025)

- **Administrative Officer**

Heptagon Technologies - Associate-Software Developer (DEC 2021 - AUG 2023)

- **Project user manual**

  Developed and deployed a responsive single-page user manual website for an Automated Bar Application using HTML, CSS, and JavaScript. The application features an intuitive UI with a responsive navigation menu, optimized for various devices.

- **Employee management WEB Application**

  Built a multi-level user management system for internal employee operations, featuring modules for attendance, payslips, leave requests, and multi-tier approval. Developed as part of a company-specific solution with a focus on scalability and role-based access.

- **Social media admin pannel**

  Designed and developed a full-featured admin panel from scratch as a Frontend Developer to manage mobile application users via a web interface. The panel includes functionality to view user activity, flag accounts, suspend access, and remove users based on reported cases, ensuring effective user moderation and control.

- **People on boarding WEB Application**

  As an Associate Software Developer, assisted in the development of a fully digitalized employee onboarding application. A key feature of the system was dynamic form mapping, enabling seamless customization and automation of onboarding workflows.

- **Medical Instrument Service Management WEB Application**

  Collaborated with a team to develop a web application using Angular 14 for managing medical equipment servicing. The application features a multi-level login system and includes modules for raising and responding to service queries, both internally and with clients, ensuring streamlined communication and efficient issue resolution.

- **Heaven Craft Interio Web site**

  Independently developed and deployed a single-page portfolio website for Heavencraft Interio after my tenure with the company. Built the frontend using modern web technologies and hosted the site via Netlify for seamless performance and accessibility.

- **Engineers Engineering Work**

  Contributed to the renovation of the EEW Company website by working with the existing codebase. Focused on frontend bug fixes to improve UI consistency, responsiveness, and overall user experience.
